Solid Dose Training Program

The Manufacturing Process and Troubleshooting

Hands-on Seminar

Techceuticals
“Experts with Real Experience”
The Manufacturing Process and troubleshooting

The Manufacturing Process is a two and a half day comprehensive course covering the essentials needed to make quality tablets and capsules.

The Manufacturing Process is exactly what our industry is about today; delivering the methodology, documentation and mindset required to meet the needs of our changing industry.

We will focus on a step by step explanation of each unit operation within the manufacturing process, common terminology, and practical knowledge of each topic. Hands on breakout sessions will be part of this course!

The main topics are Formulation,
Blending, Milling, Granulation,
Drying, Final Blending,
Tableting, Tablet Press Tooling,
Coating, and Encapsulation.

The participant will be able to quickly look at a formula and determine the processes used to manufacture it. They will be able to go into any pharmaceutical or supplement company and understand the equipment and the manufacturing pathways.

This program will put different departments on the same page and is an excellent platform for in-house training.

Even the most experienced veteran will gain from this seminar. This will be the...
TRAVEL RECOMMENDATIONS:
