Encapsulation and troubleshooting

This two and one half day training event is all about two-piece hard shell capsule filling.

We will be featuring common equipment used in the encapsulation of pharmaceutical and dietary supplements capsules. We will focus on a step by step explanation of each unit operation within the manufacturing process, common terminology, and practical knowledge of each topic. Hands on breakout sessions will be part of this course!

The main topics are how capsules are made, common problems with capsules as a raw ingredient, vegan capsules, capsule filling technologies, manual, semi-auto, intermittent and continuous motion technologies.

Preparing powders for encapsulation and formulation, order of addition, bulk and tapped density issues.

Setup, operation, cleaning and preventive maintenance

Capsule defects and defect resolution.

The participant will be able to quickly look at a formula and determine the processes used to manufacture it. They will be able to go into any pharmaceutical or supplement company and understand the equipment and the manufacturing pathways.

Even the most experienced veteran will gain from this seminar. This will be the most enjoyable and educational seminar you have ever attended.

TRAVEL RECOMMENDATIONS:

Airports: **Cleveland Hopkins International Airport** (CLE) is approximately 15 miles from Techceuticals training center.
